

Mom Home

Complete Feature Tree

A single map of what works now, what must be finished before Mom's handoff, and what remains planned for later.

WORKING NOW

Already built in the current app or cloud foundation.

BEFORE MOM HANDOFF

Necessary for a confident real-world handoff.

FUTURE BUILD

Important ideas intentionally deferred past the first launch.

How to read this map

Each numbered branch is a feature family. The indented bullets are the real capabilities, records, actions, and safeguards inside that family. Status is intentionally shown per family to make scope decisions easier.

1. App Foundation

WORKING NOW

iPhone-first web app

- Mobile-first Next.js and TypeScript app
- Installable PWA manifest and Home Screen icons
- Production-only offline app-shell service worker

Local-first household data

- Device data stays available in browser storage
- Incomplete household records are allowed
- Search spans the core household records

Core navigation

- Today, Tasks, Calendar, Inventory, More
- Dedicated views for low stock, places, orders, purchases, supplements, help, and reports

2. Household Inventory

WORKING NOW

Item records

- Name, category, brand, barcode, quantity, unit, condition, notes, expiration, preferred store, replacement link, photo
- Quantity states: unknown, plenty, enough, low, very low, out, too much

Locations and containers

- Rooms, closets, cabinets, drawers, shelves, bins, boxes, fridge, freezer, basement and garage areas
- Nested locations, container notes, inside/outside photos, last-reviewed dates

Stock and ordering

- Low-stock view
- To-order list with urgency, preferred store/brand, estimate, notes, order status
- Linked inventory and order records

QR labels

- QR codes for locations and containers
- Scan URLs open the matching bin/container record

Photos

- Camera/file input support
- Large camera images are downsized before saving

3. Tasks, Priorities, and Projects

WORKING NOW

Task records

- Title, notes, open/doing/waiting/done/skipped/cancelled status
- Due date, reminders, effort size, related item/order/purchase, help request

Personal priority system

- Configurable stars: off, one gold star, 0-3, or 0-5
- Fully custom flags: name, color, shape, symbol, meaning
- Fully custom tags
- Multiple flags and tags can be combined on one task

Task views

- Open, next up, today, starred, quick wins, waiting, blocked, all
- Readable full titles; no important wording hidden by ellipses

Projects and sequencing

- Projects with notes and color
- Task prerequisites/dependencies
- Ready vs waiting vs finished distinction
- Project progress and task ordering
- Add task directly inside a project

4. Calendar, Reminders, and Focus

WORKING NOW

Calendar

- Events with date, time, all-day, location, color, repeat rules, linked task, notes
- Daily, weekly, monthly, and yearly repeats

Reminder and nag controls

- Reminder minutes before an event
- Optional nag interval settings while the app is open

Focus Season

- Adjustable 1-180 minute focus timer
- Quick presets: 5, 15, 25, 45, 60
- Can attach to an open task or a personal focus
- Start, pause, resume, restart, persisted remaining time, gentle chime

5. Purchases, Orders, and Receipts

WORKING NOW

To-order workflow

- Needed, ordered, purchased, received, cancelled, no-longer-needed states
- Order number, tracking link, expected delivery date, ordered/received dates

Purchase history

- Store/vendor, product name, brand, date, quantity, price, unit price, product link
- Receipt link or receipt photo
- Purchase preference and reorder recommendation

Relationship to inventory

- Purchases can be linked to inventory items
- Manual order and delivery tracking fields are available

6. Supplements and Personal Records

WORKING NOW

Supplement inventory

- Name, brand, bottle photo, dose directions, pills per bottle, remaining count, reorder threshold
- Preferred store, product link, notes

Taken logs

- Taken time, amount, notes
- Recent log history and remaining-count support
- Clear non-medical-advice boundary

Energy journal

- Time-stamped energy label and notes
- Journal only: never proactively determines tasks
- May inform suggestions only after Mom asks

7. Export, Reports, and Manual

WORKING NOW

Exports

- CSV, JSON, plain-text export
- Printable PDF report
- Supplement CSV export

User manual

- In-app searchable help center
- Overview plus detailed feature instructions
- PWA/Home Screen guidance

Report behavior

- Separate print and download-oriented report flow
- Export content should remain readable in common spreadsheet and PDF tools

8. Cloud Protection and Shared Access

WORKING NOW

Account and cloud foundation

- Firebase email/password sign-in and password reset
- Firestore household documents and Storage foundation
- Local device copy remains primary; cloud transfer is explicit

Manual backup and restore

- Create an owned household from device data
- Numbered cloud revision and protected date
- Back up this device, check cloud backup, restore with confirmation

Roles and sharing

- Owner, admin, helper, viewer roles
- Invitation codes, pending approval, revoke access
- Helper access excludes the future private vault

Audit and safety

- Household activity/audit record foundation
- Firebase rules restrict data to household members

9. Interface and Customization Foundation

WORKING NOW

Functional interface

- Current working mobile interface covers every core record type
- Stable Today interface contract separates live data from future visual designs

Visual design status

- Final graphical interface is intentionally deferred while new references are created
- Future designs must keep real HTML controls, readable live text, and accessible navigation

Settings

- Star-system preference
- Today-view preference/last-used setting

10. Required Before Mom Handoff

BEFORE MOM HANDOFF

Final visual integration

- Install the chosen graphical home, Tasks, Add, and secondary-screen direction
- Map every visible design element to a real action and data source

First-run and data confidence

- Blank/start-with-examples choice
- Remove or hide demo data for Mom's first experience
- Friendly empty states and recovery messages

Real-device QA

- iPhone Safari and Add to Home Screen test
- Camera/photos, scrolling, keyboard, touch targets, offline behavior
- CSV/PDF verification in Mom's likely tools

Deployment

- HTTPS production address
- Firebase allowed-domain and production verification
- Backup/restore test with realistic data

Security review

- Review household roles and Firebase rules
- Confirm no sample/test credentials or data are exposed
- Confirm private vault exclusion before vault work begins

11. Planned Household Intelligence

FUTURE BUILD

AI daily briefing

- Daily docket summary of tasks, flags, stars, calendar, purchases, supplements, and household signals
- Suggestions only; user confirms any action

Ask-for-suggestions mode

- Mom can ask for light suggestions on low-energy days
- No proactive task selection based on energy journal

Purchase intelligence

- Same-item matches, substitutes, comparable prices, cheaper/premium/outlier choices
- Vendor-neutral provider layer for any store, not only Amazon/Walmart/Home Depot
- Confidence labels and checked-at timestamps

Imports

- Receipt screenshots and digital receipt links
- Email parsing pipeline and review queue
- User-reviewed imports from retailers and vendors

12. Planned Reminders, Help, and Delivery Support

FUTURE BUILD

Push reminders

- Background iPhone notifications
- Configurable strong nag mode with vibration/chime where the platform allows

Help and emergency

- Ask-for-help handoff with notes
- Emergency-style helper alert with explicit limits: not a substitute for 911/Emergency SOS
- SMS/email fallback format for assistants/helpers

Delivery follow-up

- Manual order tracking reminders
- Future carrier/delivery status integrations when reliable sources are available

13. Planned Mapping and Visualization

FUTURE BUILD

Project views

- Tree view for household projects
- Branch view for parallel work
- Flowchart for what unlocks what

Everything Map

- One cross-household dependency map across projects, errands, inventory, ordering, and helper work
- Blocked task explanation and prerequisite counts

14. Planned Privacy and Vault

FUTURE BUILD

Private vault

- Client-side encrypted records
- Alphanumeric passphrase
- No biometrics by default

Lockdown and recovery

- Lockdown mode
- User-approved recovery-key workflow
- No hidden helper or son backdoor

Sharing boundary

- Vault always excluded from helper/admin sharing by default

15. Planned Sync Evolution

FUTURE BUILD

Live multi-device sync

- Record-level synchronization
- Offline queue, conflict resolution, and deletion tombstones
- No silent last-writer-wins behavior

Cloud media

- Private photo/media transfer during backup
- Cross-device media availability with household permissions

Scope note

The final visual interface is a separate design track. It must sit on top of these features rather than remove their data, navigation, accessibility, sharing, or safety requirements.
